

	Assumptions about peoples' lives	Assumptions about support and services in the community	Assumptions about systems
Assumptions about the current situation	What is people's lived experience now? Especially people experiencing marginalisation	How do current supports and services help and hinder local people to live the lives they want?	What are the elements interconnections, dynamics and boundaries of the system we are working in?
Assumptions about the desired future state	What do people want for their lives?	What should future experiences, services and supports look and feel like?	What should be the elements interconnections, dynamics and boundaries of the future system?
Assumptions about the actions that will shift the current situation to future state	What experiences might prompt and support people to realise the changes they want in their lives?	What actions could shift current services and supports into the desired future state?	What kind of place-based initiative could shift the current system into the desired future state?
